

JOE GIBBS DRIVEN™ HOT ROD

Racing Technology Drives Unique Lubricant for the Hot Rod Market

From the leader in racing lubricants, now comes a lubricant designed specifically for hot rods, street rods, and vintage cars. Joe Gibbs Driven Hot Rod Oil builds on the formulation that is used by thousands of racers while adding critical additives to protect engines when they are not running:

- **Higher levels of Zinc (ZDP) than regular passenger car oils.** Delivers proper anti-wear protection for older style push-rod and flat-tappet engines.
- **Superior camshaft wear protection chemistry.** The same wear protection found in *Joe Gibbs Driven Racing Oil* which has powered Joe Gibbs Racing to multiple NASCAR Championships.
- **Uses the same oil additive technology developed for the U.S. Military** for storing and shipping their combat equipment. Protects against rust and corrosion so your engine is protected even when it's not running.
- **Synthetic formula provides the best characteristics of mineral oil** without the unwanted saturates that can lead to sludge and varnish, and it provides **improved cold-start protection** compared to conventional oils.

Available in 15W-50 and 10W-30
